

Penrose

"We lived in Trelights for a couple of years while we demolished the Bus Shed and built *Penrose* on the site.

The whole family played a major part in the building - see Elin in the digger!

We moved in in 2004, no staircase and not many walls at that stage, but gradually we finished it room by room. The house is on three floors; two double bedrooms on the ground floor, then up the stairs to the main living area and wonderful views. The top floor bedrooms have views right across Port Isaac Bay.

Penrose has so much of us in it, it's going to be hard to move anywhere else, but the children are all adults with their own lives and houses so one day we must find something smaller." **Sian Fletcher**
